## **Project name**

Optimization of business processes of Piramida by introducing ICT equipment and solutions

## **Short description of project:**

Piramida procures ICT equipment and solutions as part of the project. The reason for the investment is the possession of outdated IT infrastructure that has slowed down the day-to-day operations of the company. As the company is a promoter of modern production that is constantly growing and developing, new equipment will optimize its business processes and thus increase work efficiency.

## **Project goals:**

Improving business processes, increasing business efficiency, hiring new employees and increasing revenue.

## **Expected results:**

With acquired, installed, functional and networked ICT equipment and solutions, employees are trained to use the same. In addition to the above, the result is increased efficiency, saving time and resources, better internal communication in the company. The integration of business functions will contribute to networking ICT equipment and solutions so that more people can work on the same problem simultaneously and share knowledge and results in real time using software on different computers.

## **Total project value:**

HRK 1,192,525

## **EU support:**

HRK 537,868.80

## **Project implementation period:**

From March 1, 2019 to March 20, 2021
