

CLFine™ 

Water-based solution to clean the air!

NIPRO

Live Longer. Live Better.

Welcome to the world of CLFine

where safety and playfulness blend seamlessly, providing peace of mind for you and a safer environment for our children.

How do you protect the joy and wonder of childhood discovery in a world filled with unseen health threats?

As early educators, you guide our children through these challenges every day.

But, what if safeguarding these young ones could be simpler and more efficient?

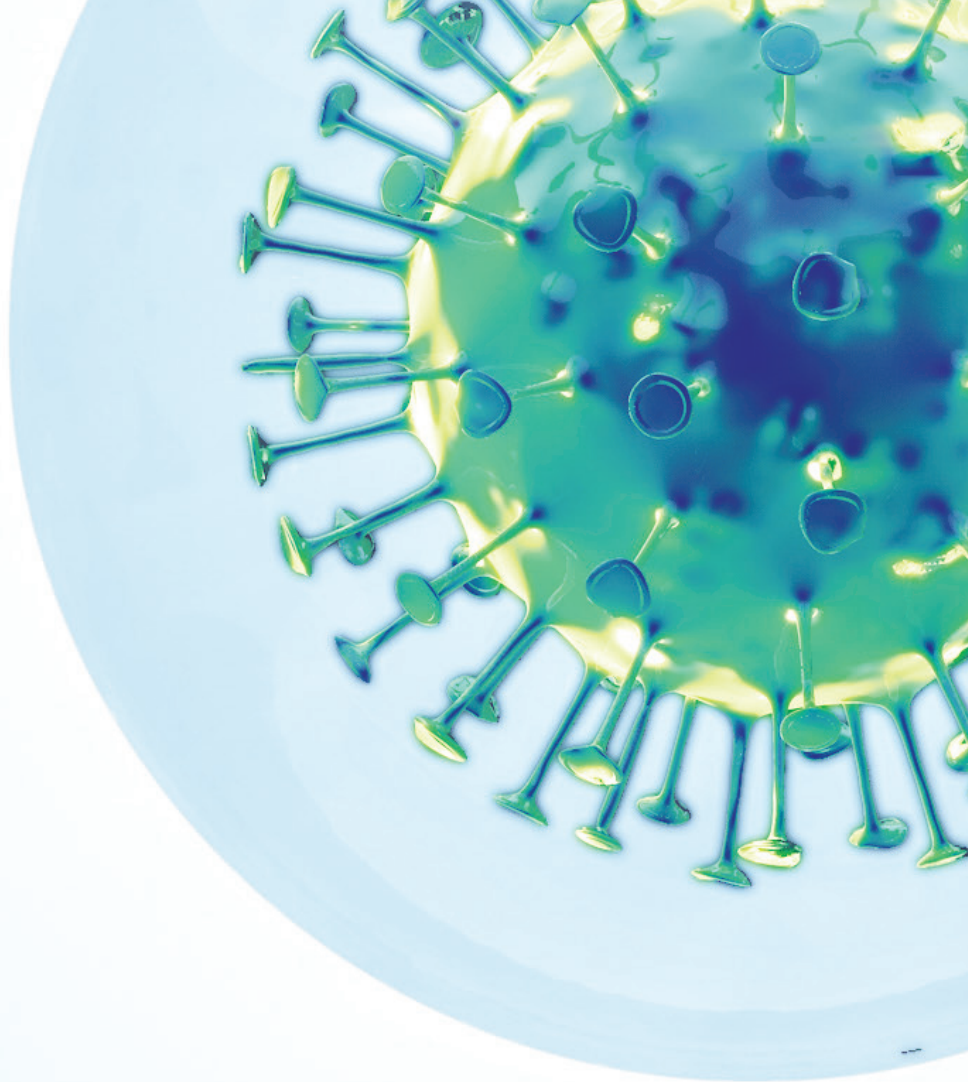

Imagine an innovation that quietly and effectively fortifies our classrooms, reducing health risks without disturbing the joy of childhood exploration.

We've got news!

The future of child safety and health has arrived, transforming our understanding of cleanliness and protection in preschool spaces.

**Are you ready to embrace this pivotal change
for children AND for teachers?**

Introducing an innovation that literally “CLEARS THE AIR”!

CLFine, a water-based solution, was launched in Japan in 2020 and has since been subject to many verification tests and studies. It has proven its efficacy, safety, and quality.

In Japan, clinics, hospitals, pharmacies, and other facilities have adopted the use of CLFine as an infection control measure. Reduce the risk of airborne transmission of bacteria/viruses by atomizing the water-based solution of CLFine.

Trusted by well over 3,000 organizations

Demonstration of scientific evidence

OPEN SPACE

OVER 99%

of bacteria sanitized
with CLFine™ within 1 hour

Paper
99%

CLOSED-OFF SPACE

A significant reduction in the number of bacteria on the toys when CLFine™ is sprayed inside a closed chamber

Plastic
90%

Wood
86%

Changes in bacterial counts of adherent bacteria on toys (rubber, plastic, wooden, cloth, and paper) after use were compared with purified water and wiping.

CLFine was atomized in a special container for 5 hours.

ATOMIZING REDUCED BACTERIAL COUNTS

For children:

"Nurture their potential in a safer haven."

CLFine creates a safer environment for children to thrive.

For teachers:

*"Unburden teachers.
Empower them to focus on
what matters most - the
children."*

Ultrasonic Atomizer

Open space

Experience the power of CLFine with its ultrasonic atomizer. The mist gently envelops open spaces, not only refreshing the air, but also effectively inactivating viruses and bacteria. Its subtle and safe nature allows for uninterrupted learning and play for children while creating a cleaner and healthier environment.

Closed-off space (chamber)

Optimize sanitization with CLFine in a closed-off space. Atomized CLFine ensures meticulous cleaning of smaller items, including toys, by effectively inactivating germs and threats. Elevate cleanliness standards by using CLFine in enclosed areas, reaching beyond hard surfaces to thoroughly sanitize all materials.

CLFine™ 

Redefining Clean Air Standards with
IONLESS Hypochlorous Water

Choosing CLFine aligns with our promise of helping people to **“LIVE LONGER. LIVE BETTER.”** - this is about more than just the present moment. It's about fostering a healthier, safer future for our children, contributing to their lifelong wellness.

Embracing CLFine is choosing a future where the innocence of play and exploration isn't marred by the invisible threats of illness. It's about embracing our mantra, helping our children to not just live longer, but to live better.

Let's take this crucial step together. Connect with us today and transform your learning environment into a haven of safety with CLFine. Because the world of a child is precious - and our mission is to protect it. Choose CLFine - for their future, for our peace.

Choose to “live longer and live better”.
